- Hello. I'm jeff DeRemer
- I know I am nobody you have heard of..
- watch this a 2nd time .. then I won't be new :)

- seems like .. life is a story
- Like we're all stuck inside someone *else's* dream of mansions & yachts
- their dream has been going on .. for a long, long time
- I'm no longer .. satisfied .. with life 1.0
- I'd like to make our story better

- For last few years.. I have been working on all that follows; flying cars, parks, new work, a new alt-currency, a space elevator, but most of all - a new kind of computer system
- I put >1,000 hours into designing the computer system, alone
  - system only got 5 slides
    - time's up
  - vector-driven DBs are an amazing future
  - I'm not the only one exploring that fact
  - But - like all the other pieces in this overall plan - my approach to v-DB is ..perhaps.. unique
- last few months - I've taken 1,000s of pages of notes, recorded hundreds of these videos
  - they barely mention half of the ideas I wanted to share

- This all started with flying cars & a new Latin Codex for Systems Automation
- But discussing the infrastructure needs – along with their potential for growth – grew into a multi-faceted business that could be huge.
- And - if done correctly - could really be used to bring people together

- I feel America is in a place where ..
  - No matter what "side" you're on.. we all could use a breather
  - From each other, maybe even from ourselves
- I mostly want to connect w folks who are ready for a break from .. Today

- I'm sorry for how badly these videos came out
- they can't begin to convey how big all of this could become
- But .. & it's impossible to express how awkward this is .. on top of everything else - I have decided to run for president
- let's face it;
  - Biden is weak. There's no nice way to sugar-coat that
  - RFK is more than enough to topple Biden
  - we CANNOT have a 2nd drumpf term
- This isn't where I saw any of this going, but .. I can't get it out of my head that Biden simply can't win

- There are no other *real contenders
- I don't mean me. I know I'm a nobody - But honestly;
  - Kennedy
  - Cartoon mouse
  - Alzheimer's patent, knowing it had failed, then sold his lie for billions?
- Nothing comes close to the moniker "the flying car president"
- I'd love to parade that exact message up & down every Red State there is. As loud as I can. For as long as I can
- # 1 goal for all of this? ..
  - (i mean – a tie with the flying cars) ??
  - Live your best life. That means being done
  - It is time to look away from donald drumpf

- Assuming that "uniting" people is the goal
  - & honestly; I can't tell, anymore
  - this country is so torn apart in so many ways
  - it is becoming unrecognizable
  - It feels ~almost unrecoverable
  - I don't want to give in to that.. it's not just drumpf, that's doing it
- Seems we are not even at a point of "be nice to each other", anymore..
  - it's more like "stop hating each other SO intensely, that you are poisoning your own minds"
  - That feels closer to today's levels of hate, sometimes

- We all need a break from each other's
  - religion
  - gender & orientation
  - skin color
  - all of it
  - I know that *you* believe in *your* hot topic
    - I support you, I really mean that ..
  - BUT - lots of us need a break from each other's hot topics
    - I mean that, too .. both of those statements true

- I feel we are reaching a crescendo. With several things
- People aren't just 'willing' to cross each other's boundaries..
- They're eager

- I can't influence that in the country as a whole .. but I can definitely influence it in the parks
- I have my agenda, too
  - I want a break – at least for a little while -- from all those other agenda items
  - I want my flying cars
- nobody can claim to be a president for ALL of us, by so clearly taking sides with just SOME of us

- the agenda items that I want to elevate – at least for a little while ?? -- are ones I feel we all share
  - nature is good - let's get out into it
  - flying cars are better - let's be chauffeured around, no more traffic
  - exploration is best - I can't wait to see the world, possibly space
  - Let's reach towards any of those things

- Because alternatively – we just go back to more neighbor-bashing
  - I can't dictate to any of you that *my* agenda must become *yours*, now ..
    - but - I can definitely reward the people who are OK with responsibilities
    - and those who can avoid all this agenda-screaming

- our story will need to be bigger & better than some of the most well-known
  - robin hood?
    - definitely tempting , but I'm jeff DeRemer
    - no crime for me - - I can do better - convince them they want to share
  - henry ford?
    - He had "car for the common man", sure – but I'm Jeff DeRemer
    - He couldn't make an offer of "earning cars, while on vacation" .. I can!
  - our founding fathers?
    - we're on shoulders of giants here, but they didn't have 'bill of responsibilities'
      - We need one!
      - and my name will be 1st for all of them

- what is it I would want, out of Life-Story v. ***2***.0??
  - flying cars & complete supporting infrastructure
  - space elevator named Mt. Olympus, on a man-made island in the middle of the Pacific Ocean
  - the ability to visit anywhere in the whole world!
  - the ability to get PAID to visit the whole world!!
  - a compassionate robot, named "me", that has *my* back , always
  - at long last – humanity's foothold, into space

- I am confident we can do this - "*all* we need to do" :-) - these 4
- 4) Convince - *just a handful* - of the world's 1,200 billionaires:
  - "You want mansions - up on mountains
    - and flying yachts, built right into those mansions"
  - we just need to sell a handful of those
  - i mean – picture that – a yacht – coming out of a mansion – parked at the top of a mountain

- 3) Convince 1-2m ppl in leadership roles - of basically the same
  - What *you* guys want – are home-sized efficiency-pods on the mountain..
  - Flying-RV type efficiencies built into them
  - No more .. "selling out our country for a ride on *someone else's* yacht!" {*hint, hint*}
  - No-one in particular. No name-calling. No poo-flinging.
  - You're all lovely, wonderful people. Both sides of the aisle.
  - I thank all of you in advance. For the lovely words. About Terran Astra Parks

- 2) Convince 1-200m middle class
  - home cubbies – sometimes up on mountainsides
  - with pods for the buses & the gliders
  - Sell those to couple hundred million middle class

- Mostly, though
  - convince billions of vacationers all around the world
  - Take a cruise at 80k ft, with an ice halo streaming out behind our Strato-Liner
  - "your vacation is humanity's salvation"
  - that's a slogan to beat all slogans!

- Who doesn't want their own Vacation Pod ??
  - I see selling literally a billion of these

- easy, right??
  - "all I need to do"? - not convince rich people to buy a mansion ..
  - "all I really need to do"
  - convince YOU .. to change
  - To let go of those thing that have you so pissed that you've learned to hate your fellow man
  - None of us gets this, while we are all facing off against each other, daily
- Wanting flying cars is easy
  - Letting go of hate is the challenge that worries me
  - hardest challenge, for some of us, right now - seems to be letting go of drumpf ..
  - Seriously?? Would we still rather talk about that? The emperor with no clothes? The boy who cried wolf? (over and over and over)
  - I'd rather talk about flying cars, now

- if all you see is someone to be pissed-off at -- then I was wrong
  - too white
  - too straight
  - too liberal

- Or – maybe a majority of you truly *do* need to hold onto your anger
  - I guess all the rest of us get is to be stuck inside all this clobbering of one other
  - While we all watch to see which billionaire wins the new "biggest yacht so far" contest

- I've no idea if these plans can be any of the things this country so badly needs
  - I just want a better story
  - if nothing else .. turn away from "brother v brother" type messages
  - *your* peace of mind is worth more than *their* echo chambers of hate

- With all that divides people in this country .. very little that unites us

- One of the only 'safe' topics is sports
  - I have no use for sport-Ball
  - I can't stand the phrase "YOUR LOCAL SPORTSBALL TEAM!"
    - I don't have one of those. Nor any interest, thanks.

- that and "end-stage capitalism"
  - I also have zero use for "NEXT YEAR'S MODEL LINEUP"
  - and less interest still in "coming soon" signs

- Is that really it? Is that really all we've got to look forward to?
  - If we do this – you *will* have "YOUR Terran Astra Park"
    - Yes.. It'll pay you..

- things that divide have become larger than anything that unites
  - I hope to bring something we can all believe in
  - and something we can all "work" together towards
- But – even "work" has become something many of us dread ..
  - we will need to do better, if we are to get into space
  - I want these jobs to be the most exciting in the world ..
  - I want them to pay in Park Rewards
    - 60% of the trips to the space elevator are earned, *only* through work
    - NOT by virtue of wealth!
- Tell me that "Trips into Space" wouldn't be a better incentive than "I'm the jobs president"

- Biden recently visited a United Auto Worker plant
    - Hi, Joe
  - I respect that?.. Kinda..?
  - My "Bridge to Business" approach *will* be better
  - whether that's just part-time work for any given company's people
  - or partnering with food, transpx, hotel, & entertmx industries
  - "Vacations through Terran Astra Parks" will make a great incentive for all kinds of companies
- I want to build partnerships *with* all kinds of companies
  - 2 rules of partnership with me
  - they're both "do the right thing"

- 1- pay your taxes (no havens)
  - *some* of you might have the odd slip-up, I know
  - look forward to partnering *all* of you
    - right after aforementioned slip-ups get corrected
- 2- pay your people
  - If this 2nd thing was in place – there wouldn't be a need for a strike

- Neither of those 2 should – ostensibly – even be a thing in need of mention
  - But .. here we are

- Instead; I want to find incentives ..
- ex: companies' management can only get credits through the companies they represent
  - Or - put another way
  - If you don't pay the people on the picket line, you can't have the mansion on the mountain
- C'mon – That's a little better than "I walked the picket line with 'em"
- I mean – for all parties concerned, right??
  - Bye, Joe

- I also won't have any advertising on my platform
  - paid taxes? paid people? You're fully advertised, with me

- On an even larger scale - I really hope I can get other leaders of the world to see
  - this ice-Halo design is arguably the *best* overall answer for global warming
  - if we had this network of buses, each w ~50k gallons of water ballast - what would that do for the fires in Hawaii & island of Greece ?
  - for that matter -- what would change if we have 1/2bn gallons or so of water, available in the skies??

- I don't think that was the last of the wildfires
  - These messages don't effectively convey how well I feel this infrastructure could represent a LOT of relief
    - the ice halo on a global warming scale
    - and the water ballast for more focused fire-fighting

- One last consideration.. (***If*** 'president' ever happened ..)
- I only want these parks long enough to build the flying cars
  - then they belong*** to the community ("belong***")
    - Definitely going to keep a few rules in place for them, even after turned-over
  - we can practice the monetary system - during that 4 year period
- Point is; I am 100% OK w most (not all, but nearly) of the earnings going into a general fund during the entire 4 years ..
  - Discuss conditions candidly
  - Your mileage will vary, etc.

- If there was progression to this story of "Up & Away"
  - Level 4 - Top - add a "global story" to this story .. something like war of the worlds - something for the whole world to get behind
  - Level 3 - huge w space elevator & a regular vacations into space
  - Level 2 - mid-size company, w buses all oer world
  - Level 1 - small business, a couple dozen parks few thousand flying RVs

- Flying cars, space elevators, parks that pay us, earning vacations?

- all that and we are going to peel back the veil of time??
  - I like this story ..
  - I think we can do big things with this story
  - I hope we can get started on this new story .. soon

- in fact - I know exactly how we can get started. Right now ..
  - step 1 .. look away
  - Everybody
  - De-exist that guy
  - Life.Next awaits
  - you don't need to retweet, copy & paste, watch videos, forward videos
  - That emperor never had clothes. Don't do his free advertising anymore
  - not just the news. Folks in the trenches are forwarding his every word, obsessively

  - Can we all please talk about flying cars, now ??
  - I am SO done with all the rest of it ..
