i am – Jeff DeRemer

- I have always dreamt of flying cars
- I have some ideas that I think are different from what i have seen, and are worthy of exploration
- This presentation will be a bit rough. Sorry. I've never done this
- I just want to see if I can connect with like-minded folks who might wish to go along on this journey with me
- There's a lot to cover. If – at the end – you feel like some part of this seemed interesting -- I'd love to hear from you. Maybe send a few bucks, if you have the means
- But – if AN Y of this resonates with you - I would truly love to hear from you
- #TerranAstra :-) More, later...

"Quick" versions of:

- About me
- All "just a story" .. just a big "hey, what if?"
  - But - with luck & perseverance - I believe this is possible
- Just a brief intro – ideas that have been floating around for years.
  - Obviously; each of these sections requires entire teams & years of effort..
- Flying cars - $ Billions
  - no VCs, this time. Let's try something new
- Space Elevator - $ Trillions
- New Parks | New Restaurants – New Fundraising, $ "just" a few million gets our 1st started (?)
- New Part-time / "Gig" work | Vacation / Dude Ranch | Date night
- New Governance – the allure of "easy money" is simply too much.
  - (How many times do we need to learn that lesson??)
- New "Delta SkyMiles" | "Monopoly" - esque Currency
- New software - "Concierge"
  - We must get around several issues of today's systems, or this never gets off the ground

Copyright 2023 - Charon Software - All Rights Reserved

About Me

- New to all of this
- I 'came from less'.. We don't have to 'compare shortcomings' -- NOT some contest.
  - I know I had more than some. But I had a whole lot less than most. And definitely less than most of what I see in current leadership roles, all over the world.
- Frustrated - I climbed *my* way to a good place from being poor – but it's difficult to watch current state
  - That serotonin hit we're gonna get from vacation .. if we can just hold out .. a few more weeks, months, years ..
    - Tired of waiting & hoping for that, and it only ever coming at very expensive premiums
- I had nothing. I worked very hard to join the top 10%
- Maybe a bit Odd (definitely have been told that my whole life)
- But - I feel a valuable voice that has been missing...
  - this is all a check to see if we collectively want to incorporate more divergence, and less emphasis on the polished pomp & pageantry. All too often, "Buzzwords & BS" seem to dominate the discussions. I imagine that that's a scene that plays out all over

Copyright 2023 - Charon Software - All Rights Reserved

About Me - 2

- My suggestions usually are perceived as 'too different' .. Consistently, we hear about craving different outcomes, yet when presented with different pathways – there is almost never any buy-in. I have never understood how we claim to want things to be different, yet .. Refuse to even look at or give any serious consideration to any paths that are remotely different than any of the paths we've walked every single day of our lives... the lives we claim to want to change..
- Stuck between "I don't want to lead *any* of this, I only want to find the best" and "this has to be mine, nobody else *can* take over, or it never becomes *my* dream.
- I am older now than Wilfred Brumley was when he filmed Cocoon. So - I am not saying that it's going to be me.. But I know I am ready for change. Seems an inherent truth; only different people can bring different ideas
- I know you have *your* dream. If I get where I am going; I'd move heaven & earth to help you to reach your dream. But for now; I am raising this flag up the flagpole, and seeing if there's anyone else who wants to pursue *this* dream
  - Literally 100% of people I've spoken with about this have some innate need to modify things.
  - So far; their change requests have 100% been in favor of Status Quo
- "No Take, Only Throw" doesn't get anybody anywhere..
  - I hope I can reach a few people ready to push their personal envelop of that. Maybe even consider coming together* for some 'fetch'

Copyright 2023 - Charon Software - All Rights Reserved

Target Audience...[?]

- who is this for?
  - if you've been disenfranchised; YOU
  - If you're tired of watching a world that grows increasingly despondent (even though you yourself haven't been disenfranchised) - YOU
  - If the above applies to you, and you want to help craft these messages from low quality to something decent; I'd really love to hear from you!

Copyright 2023 - Charon Software - All Rights Reserved

Just a Story

- I don't even know if pieces of this may not even be legal, or how much is / isn't, & where
  - I have never heard of anyone trying some of what I am going to propose. Again; just a "what-if"
  - Obviously; Any place where *any* piece conflicts with local laws; obviously that's a piece we remove
- My fiduciary warnings to anyone;
  - No part of this should be seen as "financial advice"
  - This isn't the place to go if you're looking for an "investment"
  - No part of this should be seen as a promise of ANY kind
- It's obviously more work than any one man could do, even with 1,000 lifetimes [dreaming big]
- I am confident in these flying cars. I guess I could easily just start a business & try to join the billionaire club. But I honestly want to think that if we try; this one could be big enough to impact a lot of people's lives for the better.. I have to at least *try*. Again – don't know what I am doing, but here goes...
  - I don't want a story to be seen as a threat to anyone's profits
  - Sometimes when people say "we all need to be nicer to each other" they're killed

Copyright 2023 - Charon Software - All Rights Reserved

Dream Big

- The sum cost of everything I am about to describe is deeply into the billions & beyond.. Obviously - I don't have the smallest fraction of that.. but; I do believe this all makes for a winning recipe. Worth a try? If *some* of you feel that it is; I'd really love to hear from you!
- Obviously – the longer-term pieces of this would grow, slowly & in stages, if at all. We'd start funds, and chip in to them.. hopefully..
- My thinking is; gather as thorough of a list as possible, then prioritize
- Obviously; every VC in the world would strip this down to its most profitable core.. That's not my goal. This started as a great idea for flying cars, grew to include the only place I ever want to be (the parks) and then became an opportunity for generations after (?) I have no desire to "join the billionaires' yacht club". I want flying cars. Space ships, if I live long enough. To hell with the yacht measuring contest of today
- We may not get anywhere with this..
  - For better or worse – this is what I would do with $ Millions | Billions, if I was ever given half a chance
- Teachers in school told me I could be anything I wanted to be. Now I'm all hopped up on that message. I honestly believe we can do this!
- The country feels like there's a lot of angst.
  - don't know if *this* is "the cure". but we need something – and this sounds fun AF to me

Copyright 2023 - Charon Software - All Rights Reserved

Other people's ideas

- *Thier's* all suck
  - Toys for billionaires
  - Quad-copter death traps
  - "Point A to Point B". Our boats *ARE* "Point B"!
    - When you go to the airport (or bus station) - those are "means to an end"
    - When you are in your pod, on our bus – that's already where you want to be!
  - Pilot yourself – they're all proprietary, so.. work on mastering those controls
  - Designed as though the engineers had never even heard of "Center of Gravity"
  - I honestly don't see any of them as having a viable long-term future, and that's not just my own bias.. They suck
    - Air-Bus / Audi?

- The design I am going to share seems feasible and we can get started on them, for everybody.
  - I see a global market for ~2 to 5% of people, quickly.
  - That's tens possibly hundreds of millions, tens as a conservative estimate

Copyright 2023 - Charon Software - All Rights Reserved

What if someone steals these ideas?

- Most established wealthy people seem to have demonstrable track records of being pretty awful to their people.
  - Right up front I hope to make it clear; I'm Not those guys
- It's not about the "wealthy few" who'd start a copy of this. It's more about the "many" who'd follow.
  - If they are all able to start by saying "this is bigger than any of us. We know we want to leave the Parks to the communities (x thousands) and the mobility infrastructure (only exactly one) ALL to all of humanity..
  - Sure – if whoever comes out with a similar plan – as long as they are saying those thing; I can actually get behind that guy, completely. In fact; that's exactly the governance that I'm seeking, so - send them our way :)
- All of that said – NO PART OF THIS IS FREE or AVAILABLE
- This is mine / Ours. Property of "All in Favor"
- No idea if just saying "Copyright 2023" bears weight, but:

<u>Copyright 2023 Charon Software – All Rights Reserved – No Stealing :)</u>

Flying Cars – 1) Pods

- Pods
  - "My Own Space" - No "Wet Spot" , also – a place to confidently leave my stuff..
  - I don't care for being on city bus / trams. They're not my personal pod. But I need to do a lot of affordable travel
  - I can't afford a sports car, but I occasionally just want to go fast. Preferably; in my own chair
  - This system offers (hopefully?) the best of both those worlds
- Sizing Standards [A, B, C, etc.]
  - A = Smart car / 1 seater / first class airplane seat size
  - B = double A; 2 seater, restaurant booth
  - C = double B; ultra-efficiency. Can be equipped as power-assist biking across America
  - D on up – Process of expanding on the 3x4 (I think?) sizing / doubling pattern
  - ESTABLISH & FOLLOW STANDARDS.
  - re: insides – we have $2,000 -> $200,000 versions.. But outsides & form-factors: yes.

Copyright 2023 - Charon Software - All Rights Reserved

Explanation of what a chassis is?

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars – 1) Pods - pg2

- Ratings [Land, Sea, Air]
  - Land-Slow – around the parks
  - Land-Fast – on the roads – buckle-enforced (?)
  - Sea-Above – basic lifesaving
  - Sea-Below – yes, I have ideas...
  - Air-12k – open the window, sit out on the balcony, can be cheap-ish more than 2k, but not 100k
  - Air-35k – pressurized, similar to planes, more pricey
  - Air-110k – don't know what differences, but basically something that's rated for top of the atmosphere
- Safety vs. Mobility Spectrum ..
  - Doing 2mph on the ground? $2,000 bamboo is fine
  - Doing 200mph in the air? $20,000 (?) safety-engineered versions, only

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars 2) 'Chassis' - Design

- Picture a Box truck, but your E Pod (2 D) would be the "box"
- Picture a train, but 6-8 F Pods on each, coming and going
- Extrapolate that out to cars, boats, personal gliders
  - Shape it more closely to between a tug boat (with the bridge at the bow) and a surfboard
- Extrapolate even further – city bus, cruise ship, 747
  - All things we already have, except – MY personal space. I can afford it. I know it. It's mine.
  - Consequently; I am no longer in such a major hurry to get off / out.
- "Shoebox" | "cubby" design – they accept the sizes of Pods [A, B, C, etc.]
- "Modular" designs where applicable, for not much more – if we need 16 in some cases, 20 in others - adapt our "airplane sequence" to that need
- "Lego"-esque.. Ubiquitous, Size :: Function [A, B, C :: Power, Air-store, Engine] combinations
- Again; No Ownership! - (Picture Titanic's lifeboats)
  - Own the Pods? Yes. Mobility units? No.

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars – 2) 'Chassis'; Worries

- 1st – needs to be internationally owned & operated.
- That dialog is probably already open all over; we can't live under threat of what an 'owner' could do ..
- No jihad, "gone postal" / disgruntled former employees, stalker exes, launching of world war 3.. ffs
- "No Ownership" should be self-evident, but lots of people never see things through the lens of anyone else..
- On the bright side; your personal chauffer drives you everywhere

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars - Buses – Design

- Yes, I've heard of the Hindenburg – thank you :)
  - Ours are never going to land
  - etc.
- Another Comparison: If I had designed the titanic – even if 3/8ths had been smashed by iceberg, 5/8ths would still be in the form of fully functioning "segments".. Duplicate that thinking
  - Three rules; 1) Redundancy, 2) Redundancy, 3) Redundancy
    - Note that this will not be "cost effective" and is 10% why I say; **NO VC**s!
- Sizes
  - Personal (expensive, presumably?) like a yacht – still not "owned"
  - Airplane – dozen(s), headed in same direction, all in A & B (?)
  - Huge -- Local – like apartment complexes that move slowly around one place
  - Huge -- Express - "I'll get there" paced mobility units, cross between an airplane and a cruise ship

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars – Buses – Hulls & Balloons

- Independent segments – in case of emergency – separate!
  - And again; 1) redundancy, 2) redundancy, 3) redundancy
- Segments are loaded with "balloons" that can be inflated / released
- Segments are flooded with Nitrogen .. even if there was a leak; the contents are cycled regularly – leak can be identified, corrected, never cause a problem.. Even if the whole segment needs to be replaced
- Segments are connected | woven into place (safety rigging, quick release but durable AF otherwise)
- Shoebox cubby structure suspended (possibly by hundreds of feet?) with inter-connecting braces

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars - 3) Buses – Worries

- Even more of the "International Command & Control or it's Moot!" than chassis. Chassis are "Local" and battery-powered - these are meant to be global. They float. Right on over international lines.. With Hydrogen..
- We saw the reactions to spy balloons. Those were helium (99% likely)
- We all either get to have rides on flying yachts over mountains at sunset, or we perpetuate the centuries-old game of "Fire & Pitchforks on an international scale"
- I want my world. To get there; we need to have these dialogs. I am mostly interested in hearing from those who also want to share in exploring however much of this we can. NOT those whose sole purpose is "HA-HA You Talk Funny, Weirdo. I brought my pitchfork"

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars - System

- Again – stepping out of my lane, here.. We need a global system for the software. Can't be designed in a vacuum, by a team committed to cost-cutting & profits before all else. I want to ride around in systems confident that we won't fall from the sky because bill weren't paid as a cost-cutting profitability measure
- One of the things I like most about all of this is the concepts of global teams of all of us.. there is simply not a team – ANYWHERE – that can compete with that.
- We want (need / must have) a system where the global command & control can take over at any time
- The positive, here - we still have *some* autonomy! Get me out over those corn fields and see what she can do! The system will prevent you from nosediving (etc.), but otherwise -- let her rip
- Sorry – no way any single company (or even just a few) can ever again own *this much* Wealth, let alone this much Power

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars – Cost

- Billions. Honestly
- I don't have billions
- I don't want to be beholden to profits and the demands of the insatiable few
- We *can't* be. We just can't.. No, literally - I don't think we ever leave humanity's canon if we make this a corporation
- We need a "resource"-raiser
  - Not a "fund" raiser, because I don't want to think in terms of "dollars"
- A big, global resource-raiser:
  - **Terran Astra Parks** – definitely where you want to go, for your next outing!

Copyright 2023 - Charon Software - All Rights Reserved

Flying Cars – closing thoughts, for now..

- I don't want to pretend that any of this is "final form" or even remotely close to that.. I want to start some dialog, and see whose ideas are the most sought after by the widest groups of people
- All of these designs – for any part of all of this – can be made into whatever we need them to be. They could take years to get them right .. OR we can keep things modular

Copyright 2023 - Charon Software - All Rights Reserved

Terran Astra Parks – not for profit Terran side

- Parks / Restaurants / Amusement Parks / Vacations / Events Halls
- What they're *not*;
  - No "ownership" - these are community fund-raisers, dedicated to raising money for flying cars - the only business
  - No "investment" except – come and have dinner & rides. Help us grow the place organically
  - No "agendas" .. we can only support everybody, by saying that equally; if it's incendiary – it waits outside
  - No "living" / addresses (?) .. these are just places to visit.. Even if you stay a few days -- your address is still someplace "Terran"
    - I would very much like to address homelessness and I am not sure how this fits within 'nobody *lives* here'
  - No "jobs", per se – these are meant to be Date night, or Vacations, or "Dude Ranches", maybe even a side thing
- Rotating opportunities to explore places and 'things to do', even when that means things that others have thought of as jobs.
- The ability to work all over – like the ride-share apps, except if you were *my* driver, you could wind your way across country over the course of weeks & months

Copyright 2023 - Charon Software - All Rights Reserved

Parks – "Restaurants"

- Leased cooking spaces – I want them available to the community
  - % that's for mom & pop
  - % that's to be shared by community restaurants
  - % that's prioritized for personal use
- Lease (bid on?) eating / cooking / activities spaces..
  - $20 for the spot by the lake
  - $30 by the waterfall
  - $70 for the fireplace driving tour .. unless we were able
    - Need Thomas Kincaide style artist to draw that, as marketing

Copyright 2023 - Charon Software - All Rights Reserved

Parks – Riding through

- Eating / visiting / working can all be stationary
- Conversely; riding doesn't have to mean eating
- I want to explore different options.. Maybe batteries & wheels?
  - Long-term I would love to explore new forms of rail, TBH
- Possible to pull up near a steep-ish line (need tables that self-adjust :))
  - From there, slowly navigate in a general 'down' direction, like skiing from a ski lift
  - Winter time – "skiing" but in a B pod??? Heck Yes!
- Dreaming big - somehow incorporate trips up sides of mountains to waterfalls, crossing over rivers needlessly
- These could be 2, 3, 5, 8+ hour (a whole workday) nature trips, when we have parks big enough
- Perfect for days off – just reading, tooling through the park
- Perfect for cubicle work. Market the heck out of that. Even if nothing else changed the whole world over .. if we suddenly had this as an option for where to work; I bet >50% of office workers would say Yes
  - B size Pod would be not quite an office cubicle, or C could be fitted with a sofa :)
  - Your work can lease one of these from you - I would imagine for less than they're paying now for that cubicle you're suddenly so incredibly sick of

Copyright 2023 - Charon Software - All Rights Reserved

Parks - Events

- Dreaming big - I would hope that some of these parks are huge..
- Ideally; we'd be able to have room for lot of different activity spaces
- Meaning – it's not just coming to the park to drive through.. Not sure what else we do with them, but.. this space available :)

- Honestly; I just wanted to point out that we will have a *lot* of land (hopefully) with lots of options... what do you think? What would *you* put there?

Copyright 2023 - Charon Software - All Rights Reserved

Parks – "Lodging"

- Sunsets & Sunrises are of utmost importance.. Building cubby slots with those two in mind is a primary consideration for location
- Stepping out onto a balcony that's loaded with fruit, nut, flowering trees is an Eden-level fantasy.. I want the cubbies to also double as big "victory gardens" .. each of the dozens | hundreds of locations should have access to plenty of locally grown | *growing* produce
- Building up along ridgeline sides of mountains is a definite. If we can get the yachts lifting the efficiencies into place?

Copyright 2023 - Charon Software - All Rights Reserved

Parks – Funding - Pricing food, rides, etc.

- Costs start off as "kinda pricey" and then go up
- e.g. if a meal in an average restaurant today is $100
  - Now, ours; $135
    - slow uphill climb to multiple orders of magnitude
    - more costly depending on your net worth (?) in both terran and astral sides
- Pay part-time workers "kinda well"
  - If $15 is good, pay +35% or amount from above, + 3 to 11%
- "Tax*" & Spend
  - *I am not a government entity. I do not set tax. But the idea
  - But - I believe in this system as a potential economic powerhouse.
    - Also - I 1,000% believe in "Render Unto Caesar"!!
- For all of us to ever have *any* chance of Flying Cars – someone has to get the economy moving.. "trickle down" isn't doing it. I know the total cost to get that first fleet is huge. But to start our first park – seems attainable

Copyright 2023 - Charon Software - All Rights Reserved

Parks – that first one – how do we start??

- There's a few plots of several hundred acres for "a few million"
- I don't have a few million
- I think we could buy one piece of land, build ONE restaurant, 3 or 4 paths, a dozen or so locomotives / chassis, a few hundred "community" seating, and a few dozen "owned" personal B-size pods for ~8 million, at most?
- A couple paths, a couple stops, a couple cooking / eating buildings

Copyright 2023 - Charon Software - All Rights Reserved

Parks – Excitement

- Right now we have Amusement parks (nothing whatsoever against that), parks that you go for a walk in, and National Parks (I LOVE them – but .. we can't "build" in them)
- Right now, we also have restaurants.
  - The *same exact design*.. 8 million copies
- What *we* want - is the best possible combination of all of those;
- I want to start something similar to the 80s' "I want my MTV" .. "I want my Terran Astral Parks" .. if these become used as working spaces; there would be a demand for MANY (we hope)

Copyright 2023 - Charon Software - All Rights Reserved

Parks / Pods / Gliders

- Before we have flying cars - I can see having gliders to experiment with for safety
  - Hypno: You want something better than a roller coaster; you want a glider ride!
- In your own personal A or B size, dozens of us, all queued up at 7:40 for 8:00 pm sunset..
- Exploration of 'Launch Style's
  - Maybe there are some engineers out there? We will have more in the System section
  - Some gas engine? Some slingshot? Some railgun? Some high pressure in an air tunnel*?
  - That last being the most exciting – if we can produce that along a ridgeline of a mountain?? We could potentially find a new means of launching...
- Achieve maximum speed & height, then autonomous glide
- Either return to that same park, or go to the next park over. More adventures, tomorrow. Always a new sunrise. Market the heck out of that. Who doesn't want that??

Copyright 2023 - Charon Software - All Rights Reserved

New Work – "Pay*" - (*we need a different word than pay!)

- Some for me, some for my community
  - Like tax, except it's mine to spend / guide
- Some for now, some for later
  - "Expiring Money" .. those two words alone elicit .. change. The "Money for now" needs to be spent or .. "lost"?
  - Money for later – we enter into shared CDs: 1, 2, 3 & 5, 10, 20 year CDs
  - The more we all collectively have in these CDs – the more stable the economy becomes.. To hell w the phase "Market Jitters"!
- Again - I have zero control over US | other currency... but if Delta can have SkyMiles, can't we have Terran-Astral Credits??
- Render Unto Ceasar! This will (hopefully?) be the biggest revenue generator.. Pay homage & hopefully they will recognize that. If not; we find different | more hospitable shores. Don't create anything so "fixed in place" that most of the assets can't be moved from place to place, if ever needed

- Many will simply refuse to adopt this approach, I know. Those folks will be in the Parks (as opposed to Oases & Eden). I am mostly wishing to connect with people seeking to embrace change. Also; they realize that change isn't something we "do to others", just ourselves. Expecting Bezons & Musk to socialize billions, while refusing to socialize your own hundreds is perhaps not the mindset I seek :)
- Again – just like K.J. Un <-> the neighborhood Gun Nut.. the folks who will never see any form of community are mini versions of the billionaire class .. & vice versa

Copyright 2023 - Charon Software - All Rights Reserved

New Work – Work-a-Day / "Gig"

- I want internal work – even | especially governance – to be period-specific. Do a specific task or role, for a specific time, pay & earn a specific amount
- What we're not: Status Quo
  - I don't want to "hire" anyone .. no "80k / year" jobs, sorry
  - I don't want an internal team of individuals..
    - I know that this will take some acclimating.. The outer parks are "you do the work, you get paid" like everyone is used to - I get it that ~70% or so of people will never see it this way.. but the inner Oases begin to support shared senses of responsibility.
    - There are millions (a majority of people) who almost seem physiologically pre-programmed conditioning forces them to scream "SOCIALISTS!" ..
      - I am not a government.. We are a collection of parks & vacation spots
- Everything – top -> bottom, all points between – is "Period Specific"

Copyright 2023 - Charon Software - All Rights Reserved

New Work – Pay to Lease a Spot

- I like the "Barbershop" approach
  - You lease the chair
  - Want the best business? Lease the best chair
  - Do you suck? You didn't even make back your lease
  - Are you awesome? You made your lease x20
- This is applicable for
  - "Restaurant" / Cooking spots
  - Workstations (Wood, Metal, Leather)
  - Rent these places for the day – do a hobby
  - Rent them for a couple weeks – earn enough for something fun
  - Anything under the Terran Astral Umbrella will be for terms & Periods

Copyright 2023 - Charon Software - All Rights Reserved

Community – interactions

- As we interact with people, we like them or we don't. Those are just the facts.. We need to make a way for anticipating good / bad?
- I truly want my flying cars. I truly believe that "Shiny Happy People" is the path to that. I truly want YOU (yes, You!) to actually look forward to each new day
- Believe me.. It's for purely selfish purposes.. But I am going to make sure that every day possible, you interact with the people most likely to connect with you & get you, and you deftly sidestep those who'd maybe harsh your mellow
- Tracking these, with as much context as possible, will lead us to our own personal "Bee Village" and I think we all deserve that
  - The #1 priority of all of the whole Park infrastructure is to build "bee villages" for those who wish to build flying cars & "the world of tomorrow"

Copyright 2023 - Charon Software - All Rights Reserved

New Work - Bounties

- New to this here Dude Ranch? :) Your concierge will check in with the local registrar, see what work sounds good.
- Lots of this is either "too expensive" or won't be long before it becomes that way..
  - $100 for meal, OR.. Do a task slated for 2-3 hours and I'll give it to you for $15
  - Intent is to shift goal , intent , & running power of the entire system away from dollars | notes | currencies, and gear it more toward a common value; how long did you work? Dollars mean vastly different things, the world over. But work is work.
  - The goal is .. find -> *create* a system that is a bit more attainable than the almighty dollar has ever been, for the folks at the bottom half
  - While also creating a system that is more fun than anything for the "Haves" who hopefully don't mind paying a little extra if they simply cannot *connect with earth
  - *Note that digging in dirt is 100% known to be healthy on a lot of different levels
- Penny-Ante means nobody has any cause to get their feelings hurt or get all up in arms about any one (or even one hundred) things.
  - Poker w buddies
- "Pay" by "job" (neither of those words is quite right) hours / a few days at most, then move on

Copyright 2023 - Charon Software - All Rights Reserved

Bounties – pg 2

- Some "on-site" work - like cooking in a restaurant
- Some work you take with you, like renting a wood-working station for a few days*
  - Maybe you want it for just that afternoon – long enough to make 1 cutting board for yourself.
  - Maybe you want to rent it for 12 days straight while you tour the parks from Denver down to the Grand Canyon. Make 100 wooden things along the way. Eat, sleep, & move around. All paid for, plus have credits in the bank. Enjoying a hobby while rolling by the river at 2.5 mph?? Who doesn't want that??
  - Either way – the workstations are leased to the Hood by the Town, which generates revenue for the City, which I hold to the strictest of expectations. Nothing but Empire & Regulations in the Cities. Much more relaxed & easy going in the Hoods. Towns operate like a business, part about the profits, part about the people
- After a few thousand interactions = better picture of what works and what doesn't (?)
- Keep your main job, set some time each week for washing dishes (or whatever – that's metaphorical) and after a period of time; earn a car

Copyright 2023 - Charon Software - All Rights Reserved

New Work – Bounties & The System

- I know we can do better than the world of today. 100% confident
- Picture Forums.. but with incentives
- Like a Call-Center, but with millions of us, and it's mostly just seeking "consensus", & we are all able to be on either side of that call
  - Sometimes you *need* a concierge. Sometimes you're helping *be* the concierge
- Picture imgur, with 1) content posting, 2) commenting, 3) votes on both content & comments..
  - All of that, except with design decisions
- Picture twitter, except with vectors.. ex: when the wildfires in CA caused evacuations, all government could do was tweet to the world at large
  - With "Concierge" – goal is definitely to communicate directly (but only, when needed) to those for whom it may be concern
- All of this with as much automation as possible.. But also humans ready & able to jump in & handle any kind of situation
  - Each of those calls might be a few pennies (verify [this] was routed correctly) to big payouts (we are stuck on this programming dilemma, and the company has offered a 50k reward)
- Whether it's 2 or 3.. or 2 or 3 thousand - we have literal teams in place to find "the BEST" possible outcome..

Copyright 2023 - Charon Software - All Rights Reserved

New Work – "Brewster's Millions"

- Some folks are great at working, being nice, and more..
  - The folks whose presence (work, social, anywhere) adds value to their world
- If you are Hard-Working+ / *Nice+ the world saw it.. we heard about it. let's live in a world where we get more than a smile & a nod
  - *Please note; I DO NOT measure success by "Units Produced". I reward on how well a person helps the overall community – not just the bottom line
- Occasionally get random "Here's 50k, go do something great, you great person"
  - That's better than the lottery, IMHO
- ZERO obligation to help anyone other than yourself
  - Want it? Take it!
- Note that; the path to Town-Level governance involves investing these winnings into a Town-Level initiative, and even then; you aren't necessarily guaranteed (~70% at most?) a position at town-level.. Just that that's how you get there

Copyright 2023 - Charon Software - All Rights Reserved

New Work - Governance

- I want "governance boards" that cycle in & out regularly
- The Brewster's Millions crowds have their submissions judged
  - Think social media, where we can up/down vote things.
  - Apply this to more than just memes – apply it to decisions made (Honestly – we need this NOW!)
- Top N% become that period-of-time's governing board
- I never want to have control of these, except to say that nobody else is going to take control of them. Or use them as their piggy banks
- Even after flying cars exist – these are for "that next thing".. Not for a few crave power to sit over the many who just want a full life
- The people who reach that level; we will all have had long fireside discussions on those things
- Eden isn't "for sale".. The places are parceled out to the best of the best of our collective best.. A system I not only 'believe in'.. I can't wait to be a part of. To see what happens when those folks are in charge.. new faces every week / month(s) at most
- Again – I am neither a government entity, nor an "employer"
- I don't want "Manager" roles that go on forever.. Government even less so..

Copyright 2023 - Charon Software - All Rights Reserved

Terran-Astral Credits

- I can't change or control any of the existing "Terran Currencies"
- I cannot set money policy anywhere in the world, but -- someone from Bangladesh is presumed to be worth a tiny fraction of an American
- I need a system that appreciates ALL people equally
- We can (I think?) create a Delta Sky Miles type program that quickly makes those currencies less restrictive.. "Buying" will be much less of a thing. "Earning" will be much, much more so.
- T.A. Governance Council can set values per Hood, Town, City, Global
- C'mon.. At some point, this MUST be talked about.. I know, I know, "HA-HA YOU Talk outside of your lane!" .. I mostly just want to hear from those who recognize this; In order for us to ever hope to reach the "Outer Space" stage of things, we MUST address these incongruities
- Increasingly "pricey" costs for literally everything in the parks can be "dithered" so that uber-wealthier people & nations pay more. If this is legal; pricing will definitely be on case-by-case bases

Copyright 2023 - Charon Software - All Rights Reserved

Billionaires & The Powers That Be

- No part of this is intended as a "Soap Box" speech
  - Fact is - "I'm not a coward, I've just never been tested".
  - None of us can say - without the benefit of having been in those positions – what we would do
- Billionaires all seem to want the same thing – the yacht measuring contest.
- Mansions & yachts – that's been the game for centuries. At least since the Romans. Probably before. Billionaires' desires are not ..... '*innovative*'
- There's a lot of angst in the world. I know better than to even mention it.. But .. Sooner or later "the poor rising up" seems inevitable, on this latest trend
- The path forward is NOT to further tighten the noose, FFS!
- What you want – YES, You Want This - is a Terran Astral Yacht
- "Sponsor a Park".. we may (???) consider allowing a program where 1 park can partly be your profit, if you pay for 6-8 (?) others as fundraisers
- *Clarence Thomas didn't even have his own yacht. He just visited someone else's. I can make these affordable for all, even THAT jackass.. Just gimme a minute, FFS
  - *No offense to that sellout in particular, the above could apply to any / all sellouts
- Bridging Gaps & crafting a lasting peace between the classes :)

Copyright 2023 - Charon Software - All Rights Reserved

Bill of Responsibilities – "Astral '*Constitution**'"

*Again – need a better / different word

- With Rights – I feel – come responsibilities
- Many people use phrase "rights" as both sword & shield
  - there is nothing whatsoever anyone can do to induce a mind-change
- But; that's not the path to my inner group. Again – it's easy for Americans to scream their indignation. How dare me?? But I honestly want to approach all of this from the point of view of "we are on airships that never land, instead they circumnavigate the entire planet, over every country, and we don't want to get shot down" , so.. This dialog seems worth being where we "start from" not where we "get to"
- With rights -- especially when those rights are being exercised by people in positions of power & influence, or involve personal safety and the power to kill -- come great responsibility. That should be self-evident.
  - 1st) Boy Who Cried Wolf -> Put Up or Shut Up
  - 2nd) Can't Get my Guns -> mini versions of Kim Jong Un & vice versa

- Flying Cars seems like a pretty awesome buy-back offer...
- File this under the "About Me" .. I am not just starting a company. I truly don't see how humanity moves forward without that simple thing that says; "you have responsibilities"

Copyright 2023 - Charon Software - All Rights Reserved

Not For Profit – in Perpetuity

- I don't want the Parks to become corporate, ever.. But also they shouldn't be models of our National Parks.
- I want them to serve as a means for their local communities to raise local funds, hold local fun events, and most importantly fund the next "Global Initiative" -- whatever those may be. We don't know – but all the people who use or work for the parks will decide what's next
- The dream of a Space Elevator could become a reality.. Then what? After that;
  - Massive floating boats on the surface of Venus, Jupiter, Saturn..
  - Mining colonies – all over
    - Who knows? But NONE of those things seem like they should be owned by "The Few" .. ever again.
- The Parks should serve as a means for literally anyone to make a quick buck, or make a living, or make a name for themselves... but never to "Take Over", LOL .. we have a history of that already, thanks...

Copyright 2023 - Charon Software - All Rights Reserved

CANNOT be Corporate - Ever

- The Buses alone are self-evident; no small group can ever control where they go. These are massive floating torpedoes. Only a group of people The *Whole World Over* can control these things. ("HA-HA Get back in your lane".. But again.. Sooner or later these become topics. And I want to connect with others who are eager to broach this topic.)
- "SOCIALIST" / "THEY'RE COMING FOR YOUR ___" / "MINE!"
  - "Today's Profits" are 1,00,000% worth killing for
  - The mantras of nazi-ism.. Staving off these attacks needs to be done sooner rather than later.
  - The avg Joe can see how important it is for "the billionaire" to give up *their* possessions. Ask them to?? Zero chance. I think 70% of the outer parks will be comprised of people whose thoughts cannot get beyond this...
  - The average Corp CEO is just a large-sized version of that … IMHO
  - The two are inverse, and equal. And they are why we cannot have nice things. They KEEP ON being in power ..

Copyright 2023 - Charon Software - All Rights Reserved

Peace Corps

- "The Economy" works for some. Most don't have Wall St. investment holdings
- Not much to look forward to. Landlord-Class bought 40% of homes. Social Security is on verge of being gutted.
- We cannot commit to numbers [Pepsi Harrier]
- Goal would be something like:
  - Years -- Get
  - 4-8 -- E & A (sizing reminder)
  - 8-12 -- F, B, & A
  - 20-40 -- Mountain Plot G, two Fs, fleet of As, etc..
- Like a "Pension" .. Except with a given amount of riding / flying / moving / and sizes & quality of accommodations
- I don't have US $$$ .. but the entire mint of available TACs would be in play

- I don't necessarily see the parks as being "places to live" , though .. hmmmmm?

Copyright 2023 - Charon Software - All Rights Reserved

Concierge

- Picture walking into a posh 5-star .. the person at the front knows all about the place, but... this particular person.. Is uniquely *Yours* .. you have a concierge who deals with others exactly the same
- That concierge app will be duplicated throughout every step – there will be a similar NPC concierge for each Hood, Town, City, as well as any Company that is a part of the Terran Astra system
- Concierges keep all your interactions, journals, notes, receipts.. But also is your chauffer (I like to go fast, you may choose slow) and also your chef (medium-well, please.. You might prefer rare)
- Concierge is a "non-intuitive" precursor to another system*
  - It's as far away as the space elevator... not "moot", but also not within reach yet...
- Ran as a game .. similar to WoW ..
  - First step; each "city" would have portions of the overall hosting
- There will be One (1) shared code-base
- Not dedicated to the latest technology.. Just to the content
- We all get to be on both sides of the concierge role .. the better you are at helping out – the more the community pays you in the form of the "Brewster's Millions" / "Lottery" things
- Not building system(s) for corporations.. Just for our initiatives Terran Astra | Flying Cars | Parks | New Vacations

Copyright 2023 - Charon Software - All Rights Reserved

New Work – "Factories" / Building the Cars

- The Parks, at this point, can stand on their own & be awesome.
- Their purpose is to "fund" (*provide needed non-$$-resource for) the fabrication of what I hope may well become the most in-demand product -- flying cars
- I want to establish a number of community owned & operated "mom & pop" build shops
- I'm sure there are many components that will require partnerships with existing companies & providers .. but I envision splitting the work 70|30 or so between big box companies and mom & pop organizations
- Obviously – the build shops (be it pods, chassis, balloons, exo-structures, all things battery, all things hydrogen, etc.) will be jobs you can work-a-day at*
  - *obviously many positions require levels of training | experience
- Partnerships with Car makers, yes! But also a solid mom & pop market – the world doesn't presently have one of those

Copyright 2023 - Charon Software - All Rights Reserved

Team Working – Design improvements

- Global team of millions on each task
- Global design considerations.. We need "co-op-etition" .. willingness to adapt quickly, try new things, judge each other's work fairly, and reach for collective long-term
- Some designs are A level, some D & F... I still want collaboration between Mom & Pop <--> Big Shop. The big shops can keep the profits, *NOT* the IP.. That's global. Non-negotiable
- No matter what size team was used to build whatever thing you look at next; our team can design a better one. We all contribute
  - Market the heck out of that! "We have no competition, but we promise we are here solely for the purpose of building *Up: Life 2.0*"
- Picture an ongoing Science Fair for the world.. could hope for a "New Renaissance", almost.. Not just answering questions reactively, but -- innovation (highly paid) and inventions (even more so) on a proactive basis
- I want to find a hundred | thousands of Ramanujan. It kills me to know; humanity has produced thousands, but crushed nearly all the rest under the crushing weight of the status quo
  - What's worse; for 90% of people hearing that; there's probably not even any recognition of humanity's loss

Copyright 2023 - Charon Software - All Rights Reserved

Gliders – Taking Off

- Maybe Gas engines?
  - At first – no on the long-term
- Maybe rail guns? Maybe air pressure?
  - Air pressure seems the most promising..
- Build a long track up along a side of a hill
- Load us at the bottom, into the barrel
- Shaped like a thermometer – bulb at the bottom where we go in
- As Glider-Pod passes segments, massive bellows release their loads behind, always building more & more pressure
- May be necessary to dig channels (or even completely "tunnel") to accommodate the pressure, but .. if we built one of these along the side of a mountain – is that a new launch? Given 20+ line-miles .. could we not get near escape velocity..?
- At a minimum – that's a dirt cheap means of getting a lot of people all over

Copyright 2023 - Charon Software - All Rights Reserved

Glider Landings – Experimentation - Pods

- I am intrigued with "Docking Maneuvers".. is this *honestly* the *only* way??
  - When we get right down to it – same for runways. Takeoffs AND landings..
- I want the gliders to be part glider, but part shuttlecock – 1 million percent for sure, there's only exactly the one direction of travel, period
- I want the landing zones to be .. almost frightening, actually.. a giant 'maw*' (need a better word), with fibers that look like millions of teeth, gradually narrowing the path while tensioning the fibers
- As the pod goes further in (over the course of hundreds (?) of meters) it's slowed and placed gently onto an offboarding track
  - I never want to do a shuttle docking!
- We also practice these for mid-air, and then outer space. An easy, cheap, & fun means of going from ground to a bus? Glide right into place. Take-off at 7:30, watch the sunset, land at 8:30 on the bus, wake up the next morning in another continent
- Your A (& B?) pods should fit nicely into one of our gliders - if your Dude Ranch vacation involved earning enough TACs..? enjoy a nice candle-lit sunset | moonrise glide
- These are for sale – expensive. A certain percent are sold, some for schools, some as make-a-wish
- Market the heck out of these glide rides … precursors to flying cars, these could be feasible in the first few years... and who wants Roller Coasters, compared to Terran-Astral Glide-Rides??

Copyright 2023 - Charon Software - All Rights Reserved

Space Elevator

- VERY long term – $ Trillions – but; what does it hurt to mention?
- Picture the 'equilibrium' stage of a mylar balloon - neither sinking nor floating
- Create 100 or so, with enough engineering, for each "stage" of the atmosphere
  - Near the top, as the atmosphere gets less dense, we have segments the size of a city, with inner balloons the size of warehouses
- Stay exactly put, regardless of temperature and wind changes
- String these together... neither bearing any load, nor extending.. All hovering in equilibrium
- A VERY long (3, 4, 5 vertebrate long?) "train" chassis, your pod at the center

Copyright 2023 - Charon Software - All Rights Reserved

Shipyard on top of the atmosphere

- Even longer term – *more* trillions of dollars later ..
- Again – another "this could only ever possibly be a thing with global collaboration"
- I want to get to space, dammit! I cannot possibly be the only one. And the current batch of spaceships will never have a seat on them for me. Or you. So; let's make our own.. Or at least begin the dialog of how we'd go about that
- The largest & top-most of the sections of the Space Elevator
- Float a massive "boat" - which is also a ship yard - as close to the top of the stratosphere as possible.. (50 km is top – 30-40 km?)
- Construct rigid bodies from extremely lightweight materials
- Empty their hulls.. When they fall back on top of the stratosphere – no matter how thin at the top – they should float
- "Void-based displacement" should 100% be feasible
- "*Those* are the yachts you want, Billionaire class!".. That message seems better than "French revolution pt 2" -- for all parties involved
- Has a dependency on the Space Elevator

Copyright 2023 - Charon Software - All Rights Reserved

Partnerships

- I'd love to partner with companies that *need* office space / work arrangements
  - (I'd love to partner with companies that *provide* office space - I am not here to knock over apple carts!)
- I'd love to partner with car companies – but also (and I insist) I want these things to be available for everyone. Like Henry Ford "car for the common man" which was honorable, but I at least have to *wonder* if we can improve on that?? (HA-HA – Get back in your lane, I know)
- Partner w cruise ships .. how can they compete? Our boats can go everywhere they can - plus a billion more places.. Let's partner
- Also hotels .. we can offer a week of falling asleep & waking up someplace new each time. 14 destinations, all in YOUR bed. Who competes with that?? Let's partner
- Same for restaurants - I want a majority % to be available for mom & pop | the public .. But I definitely want to partner with local businesses to be able to be inside, as well. Not sure about permanent installations (?) I prefer the idea of a new experience each time TBH
- More importantly; let's not tip over anybody's apple cart
- "Big Me" even talking about these things, LOL .. Dream Big, I guess...

Copyright 2023 - Charon Software - All Rights Reserved

New Lingua Franca

- ASCII -> Unicode -> Frank – a new system that says we ought to at least explore a system where we aren't limited to the 105 or so keys on the common keyboard for 99.99% of what we enter
- We've spent 20+ years "HTML encoding" the > symbol. I want a system that lets me choose them their intended way, regardless of what I see in the writing
- We spot patterns. One is the siloes of existing companies. We can create a virtual "silo", and do so cyclically. I have zero interest in spending any more time on the lates UI componentry. I would much rather create an inter-connected system that addresses the common HR | Finance | Legal | Tech questions in one place, but using a team of millions
- Built literally inside the Concierge system, I want to add "context" to "consideration" ex: "Ooh, what's that?" as a question. Means nothing, right? But you're floating around Europe.. an old castle comes into view.. context tells us -- we already know the answer..
  - In fact; context may | should open doors to anticipation (stage A1;
    - on that first inhale (stage B1)
    - or look of excitement* (stage B2)
  - even to the point of having opinions (stage A2)
- Note that in the "About Me" section I should add; I am a high risk for Alzheimer's. That terrifies me. My own personal cross to bear. But I DO NOT want to face that without an advocate.. And all too often; people don't just "Not Care"! They're downright hateful to one another. We have become a nation that has completely lost its conscience. I may not be able to convince a single person to seek that within themselves.. but maybe we can create a system that can recognize those needs. And maybe we can create a shared system where ALL of the specifics are obfuscated to remote handlers.. "That's ME" seems like the one & only way we handle everything. To hell with all lack of personal accountability. To hell with the bias of just ANY small team of programmers
- I do dream of living in a world where we instantly share without language barriers. Latin did a lot to bridge those gaps. I feel we can do even better..
- Think K2 - definitely my favorite of the Star Wars droids... Frank could, in theory, begin to act as a proxy .. including for feedback? ->voting-by-proxy .. ?
  - That latter precludes even the notion of ever again being stabbed in the soul as we have all been, by Gorsuch, Kavanaugh, and Coney-Barrett. Sorry to call a spade a spade, but – those 3 put their hand on a book – a book which they claimed made them superior to the likes of me – and swore that Roe was the Law of the Land. They swore that oath. But they lied. On their book. Humanity needs to know what it's in for. Never again can we have footballs of that magnitude pulled out from under us. Vote-by-proxy
  - I hope I don't die for saying so ..
- There's a *lot* to cover on this.. another video..? if applicable..? Depends on this 1st, I guess..

Copyright 2023 - Charon Software - All Rights Reserved

"A Case for Weirdoes" … ? :)

- Don't know how much of a 'thing' this actually is .. hopefully it isn't ..
- I am tired of sitting in the back, heads-down, never speaking, never being heard, because I know -- I know, I know -- I am weird. It sometimes – honestly – feels as though I speak some different language. in my life; I've had several friends that could "get" me .. but a much higher proportion of people for whom I am unpalatable
- I accept that. That's my burden to bear, not any of theirs. Their opinions are 100% valid.
- But – we state right up front – my "inner team" is probably going to need to be people who've dealt with eccentric weirdos for whom "typical | normal" emotion processing isn't always going to come out the ways you may expect from "normal" people..
- I see an entire world filled with leaders who are polished. If it's up to me -- I am on the lookout for other weirdoes. Other odd cases. The quiet ones. As long as your one and only (or at least "primary") agenda item is to join me on this march toward flying cars, space elevators, space ports, and boats on other planets; you're not "weird" to me!
- To be clear.. I know most people kinda expect the polish & the pageantry.. That just isn't me. Not going to apologize. I am on the lookout for the best of those folks, yes. But also I want to maintain hold on direction.

Copyright 2023 - Charon Software - All Rights Reserved

Something to Believe In

- Queue the 80s monster-ballad by Poison
- If you're half as frustrated with the world of today as I am - I hear you!
  - I don't care about "Next Year's Model Line Up" of ANY car maker (no offense – we are going to work on that with Partnerships!)
  - I don't care about ANY "Coming Soon!" Sign with another McDonalds / Starbucks
  - I don't want any more Signs, power poles, asphalt, concrete. As much nature as I can get; that's the goal. Can't *All* be nature – but we can work toward *Most*
  - In fact – it often feels like there's more parts of the world of today that I don't like, very little that I do
- What would I change...?
  - 2 mph ride through the park, connected at high speed, but otherwise virtually no signs of humanity
  - Meals, Work, Vacations, Pods, GLIDERS, Flying Cars, Floating Yachts .. so many things that are not accessible to any but a few, today
  - What is there like that today? Mudslinging.. because politics has us all shell-shocked
- Some things that have been played out;
  - Today's Theme Parks. (no offense to any of them, or the people who go to them!)
  - Restaurants packed to the gills. You, me, and 200 of our closest, all in a big common area like cattle
  - Lack of fun things to do that aren't concrete & asphalt. There are few natural sources of joy left. They've been paved over & sold back at a premium
  - I love our National Parks.. But we can't build them up like this.. We can't run them through with little train rides and shop-spots. And they aren't nearly as ubiquitous as we hope these will be
  - Besides; Some of us only ever get to see them at most once a year. Many; never at all.
- I would love to build a 3-way compromise between Wild Nature | Unfettered Capitalism | Community-accessible Fund-raising & Events.. This feels like one possible means of maybe doing something fun
- Dream Big :)

Copyright 2023 - Charon Software - All Rights Reserved

What's Next?

- Is this all just a pipe dream?
- Can we get 2 to 3 thousand folks to send a dollar or two?
- 1st goal is $2,400 and we will see what we can do for next iteration
- Maybe we can coordinate Meetup(s)?
  - I'll buy Pizza! :)
- If / when we hit $8 Million (big dream of big dreams)
  - start our first Terran Astra Park right then & there :)))
  - Even more $$ (it's ok to dream. I love this plan! Maybe a few others will, too) we open as many parks as *practical
- If you want to help .. big "if" - no obligation, and please don't go overboard.. on the one hand; even saying that seems like more over-reach.. but we've all seen how sometimes people get carried away...
  - graphics for these presentations..?
  - game design? – let me hear from you
  - Nothing so big that anyone's feelings gets hurt, Please!
- What I need are some "Meddling Kids" .. ready to make some big changes in the world , one bite at a time
- Yes, we want to track this as well as we can, as soon as we can.. but if your mindset is "get rich, make demands" -- may want to wait until those things are squared away. Early days? I am mostly looking for people who would want this badly enough to volunteer. Time means more than $$ right now. Although; we also need & want a LOT of $$$

Copyright 2023 - Charon Software - All Rights Reserved

Kick Starter ? Meetup?

- Start this under stories? May end up being all it ever is; words
- Start this under Games? We need an MMO RPG as Concierge
- We *are* starting a restaurant, so..
  - $250 gets you one "rolling meal" voucher in a shared booth
  - $2,500 gets a credit toward a *down-payment** on your own personal B-sized
    - *no way of knowing final price, at this moment. Goal would be that some entry level versions with (bamboo, screen, rattan) could be kept ~ $2500?
- I have nothing to send anybody, yet.. So for now – hoping to sell this as a story..
  - What 'swag' do we sell?
  - What about RF cards..? Loaded with codes for Rides / etc.?
- So – Here was the story! If it was worth $1 - I'd love to hear from you
- Next (or soon?) kick starter will be for a game – need to connect with some folks who can help with development

Copyright 2023 - Charon Software - All Rights Reserved

Addendum – Webcam on the Moon

- Why don't we have a webcam with live nonstop footage of what the moon's face – which never turns from earth – sees, 24/7 ??
- And please may we remedy that? I feel like this is actually a worthy endeavor, on its own.. Let's get a webcam on the moon, ffs
- ASAP – this is definitely a high priority item, for as soon as humanly possible

Copyright 2023 - Charon Software - All Rights Reserved

Addendum – "Peel Back Time" & have a see

- I am intrigued by this.. If Quantum Entanglement is truly a thing – then we can look backwards. Only by a little (8 minutes, max) and with a very limited range (it'll have to by high noon or so, local time) but .. we could theoretically do this (?) - for a lot of $$
- Form 3* concentric but offset rings of telescopes in offset orbit. Each is equipped with one of these entangled computers
  - 3 rings lets us test a separate | additional theory, plus provides greater coverage and redundancy
- If a crime was committed at exactly 12:00 : High Noon in any given city – the coordinates are given to these satellites, which turn their apertures on that location.
- Allowing for instant connection between crime -> earth system notified -> signal sent -> signal received -> & telescopes aimed.. :) the video feed that those telescopes are seeing is from 11:52 or so..
- The rest is limited by normal. Allowing for zero-lag on connecting pieces; by 12:08 we begin receiving images from 11:52
- We get to watch the events not only of the *crime itself*.. but the events of *several minutes leading up* to that moment
- We can't be sure of what else might happen when we have system which would be -- presumably – bidirectional. I don't know what (if anything, honestly...) lies around that corner. But in the "About Me" section of all of this.. I must know. Like Sam Neill in Event Horizon, I can't *not* look.. :)
  - But also - I want to check in with the world, first.. Like what do we think? Do we peel back the veil of time and see if there's secrets hidden? I vote "Yes"
- Not sure anyone else sees value in a police force that would be able to look backwards through time as part of its crime-fighting..
- Again – That could never be the property of ANY single entity -- Person, Company, Govt entity..

Copyright 2023 - Charon Software - All Rights Reserved

Addendum – "Morality Police" -> Tranquility?

- I struggle with saying something like; 'please leave your agendas at the door'
- I know how important your thing is.. And I know you're justified, because after all; "THEM". I know how much you don't care for them. But; I know them. I had a barbecue with them, just last week. That thing they do that *you* hate? They insisted they be allowed. I told them no. Gotta say that same, here, to you. I know how important it is.. But it has to stay outside.
- Enough Proselytizing. Enough "mudslinging", I don't just mean politicians. Enough banners & flags of all kinds. If it's any of a whole host of things currently tearing this country (& the world) apart; I don't want it waved around in the parks
- Do we have the authority (or – for that matter – maybe even a moral obligation?) to say such things?
- I know, I know; WAY out of my lane.. But - I am at least going to be posing that question, if given half a chance. & I'd welcome your input
- I feel we all deserve Parks ("Good - D/C quality"). Inside of the parks; Oases ("Great – B"). In small pockets of Maximum Zen; Edens ("Perfect A-A++"). Picture a Japanese Garden. Let's create thousands of those, all over. If you are at peace with the people around you – you can *earn* visits there. Frank just gets them for you, based on feedback from interactions. He's always got you enrolled in that "Lottery"
- Honestly – there's No Way we create "Eden" when we are screaming at each other like this
- So – if you think *your* agenda – sorry – don't care which – supersedes that; I am sorry - I want this to be a club, not an "open to the public" business... I'd rather not do it at all, if we can't have at least ONE spot on this earth where we can be free of the damn noise.. Serenity Now! :)
- I choose tranquility & the pursuit of flying cars. If it's legal to say that that is the Guiding Principle # 1 ? .. those are the only two agenda items permitted. Everything else has to wait outside. Politics | Religion | Sexuality-related boundary-trampling | anything "incendiary" on the world stage.. I can only create a break from that (I feel?) by focusing on nature & flying cars
- Part Rebel Scum. BORN Rebel Scum! But also part Empire. Sorry.. I honestly don't feel that we get there in the current state of humanity being nearly devoid of anything like accountability. Or a willingness to sit down, listen, & compromise... Someone is going to need to codify that into the conditionality for something that people reach a place where they want it so bad; they're willing to agree to live a little tiny bit beyond "I GOT RIGHTS"
